Notable Projects

Flourish

Project Manager/Scrum Leader

Flourish: *a Virtual Showcase for Visual Artists*. This application is a means for visual artists to display their artwork and share their contact information as a means of extending their online reach and building a fanbase.

Technologies Used: MERN Stack (MongoDB, Express, ReactJS, NodeJS)

Repository: <https://github.com/rickdeakins/flourish>

Business Operations Database

Contract Developer for Whole Practice Feeding Therapy

A fully encompassing business database was implemented per business need to include patient-related data such as confidential PII, appointment history and therapist documentation. Also implemented business operational data such as expense records, mileage tracking, tax-related documentation and the ability to scale up the scope of the database per business need.

A user interface for employee use is currently in development.

Technologies Used: mySQL

Repository is Private - Conceptual Documentation available upon request
